Member & Council Member (2008-2010), Obstetrical & Gynaecological Society of Singapore

Member, Singapore Medical Association

Member, American Academy of Aesthetic Medicine

Member, Society of Aesthetic Medicine Singapore

Ex-President & Founding Member, Overseas Medical Graduates Association of Singapore, 1995

Dr Christopher Ng was educated in Singapore and the UK. He has trained in Obstetrics, Gynaecology and General Surgery at Singapore General Hospital, Tan Tock Seng Hospital and KK Women's & Children's Hospital. He is elected as a Council Member of the Obstetrical & Gynaecological Society of Singapore in 2008-2010.

He is experienced in antenatal and gynaecological ultrasound scans, prenatal screening, antenatal risk assessment, childbirth, instrumental vaginal deliveries, caesarean section, colposcopy, cystoscopy and management of patients with menopausal and fertility problems. He is accredited in general gynaecology surgery as well as advanced laparoscopic surgery and has an interest in surgery for urinary incontinence and utero-vaginal prolapse.

He complements his practice in obstetrics and gynaecology with aesthetic medicine. He has obtained the Certificates of Competence in all aesthetic procedures recognised by the Singapore Medical Council Aesthetic Practice Oversight Committee. He is a staunch advocate of clinically proven aesthetic treatments.

3) Medical Packages

Making good lifestyle choices is the best thing you can do to stay healthy. The choices you make can help you feel better now and prevent health problems later. We therefore believe in regular preventative health screening. This can help detect problems early or prevent health problems before they occur. We offer screening packages tailored to suit women of all ages.

- GynaeMD Wellness - Designed for women below the age of 40 and who would like to be in touch with their health and well-being. This programme includes a detailed physical examination with the necessary blood tests.
- GynaeMD Exclusive - This programme is recommended for women above the age of 40. It concentrates on all aspects of a woman's health including physical examination, together with a series of medical and laboratory investigations for early signs of cancers and menopausal conditions.

- GynaeMD General - For women of all ages, it includes a detailed physical examination with the basic blood tests. There will be no gynaecological assessments.

The Speciality Programmes are designed for women who prefer to have a gynaecological health assessment.

- GynaeMD Basic - This aims to help women become more aware of their own health status. It comprises a gynaecological examination, urine analysis, Pap smear and detailed ultrasound scan of the pelvis.
- GynaeMD Pelvis, Breast & Bone - A holistic programme with focus on specific risk factors. It includes extensive investigation of the cervix, breast mammography and bone densitometry.
- GynaeMD Pre-Conception - The first step towards preparing for a healthy pregnancy. In addition to the comprehensive investigations and examinations, we will also provide advice on matters relating to conception, including fertility issues.
- GynaeMD Breast Health - Aims to increase awareness on breast health among women. It comprises a medical assessment by us as well as mammography of the breast.
