6) Basic Description of Above Medical Procedures / Treatments

Centre offers the latest and most comprehensive treatment for urological conditions. This is the practice of Dr Ho Siew Hong, a senior consultant urologist. Dr Ho received his basic medical training in Singapore before obtaining his surgical fellowship from Edinburgh and Glasgow College of Surgeons. He underwent a fellowship program in Endourology and Laparoscopy in Sydney, Australia. Dr Ho received specialised training in laparoscopic prostatectomy from Institut Mutualiste Monstsouris, Paris.

The centre offers treatment for all general urology conditions such as stone diseases, uro-oncology, prostate problems and urinary incontinence. In addition, we also focus on conditions related to men's health, such as erectile dysfunction, male hormone replacement therapy, premature ejaculation, andrology and sexually transmitted diseases.

Our centre specializes in the techniques of minimally invasive surgery. Almost all our procedures are performed with laparoscopy (key-hole surgery), percutaneous or endoscopy. This results in a less painful recovery and quicker return to normal activities.

Our motto is 'cutting edge surgery with compassion'. We offer the latest therapy and surgical techniques for all urological conditions, delivered by an experienced urologist. The touch of compassion is our priority and we attempt to deliver highly individualized and personalized treatment to every patient.
